

DocTime Log[®] Lite

Powered by Ludi Inc.

We want to make it easier for ALL health care workers to ensure they are appropriately paid for their work during the pandemic. As a result, during the COVID-19 pandemic, any medical professional — regardless of whether your organization is a customer of Ludi's or not — can download the DocTime Log Lite app and document their hours/shifts or other work via their computer, phone or other mobile device.

How DocTime Log Lite Works

1. Register by filling out our quick form.
2. Within 24-36 hours, you will receive a password, login details and instructions on how to download the app. We recommend that you sign in on your computer first. Biometric, face or finger login is enabled in the app, so you will only have to sign in one time on your phone or mobile device.
3. Log your hours and shift work easily (enter time daily). When the month is closed, hit the 'Submit' button.
4. Now your time log is waiting in the History tab, in PDF format, for you to email to whomever manages payments at your facility. You can also wait and export all time logs later.

WHAT CAN THIS APP BE USED FOR?

- Time tracking of extra hours or shifts beyond normal work, and in a new location
- Locum tenens
- Telehealth/virtual consultations
- Paying independent doctors (1099) more easily
- Health care workers who were not previously on payroll or had a contract in place
- Any medical professional at your organization (MD, DO, APN, PA, RN, Clinical Pharmacist, etc.)
- Other time-tracking needs
